# CAR-SPECIAL®

## Efficient vehicle lettering and wrapping – low cost, simple and fast

### First class vehicle search

The redesigned vehicle search will save you time and deliver the right drawing for your project with just a few clicks. True-to-scale, scalable vector drawings in five views are the perfect basis for professional car lettering and car wrapping. Suitable for all common software programmes: AI, EPS, DXF and CDR (CDR also available in 1:1 representation).

### Professional design

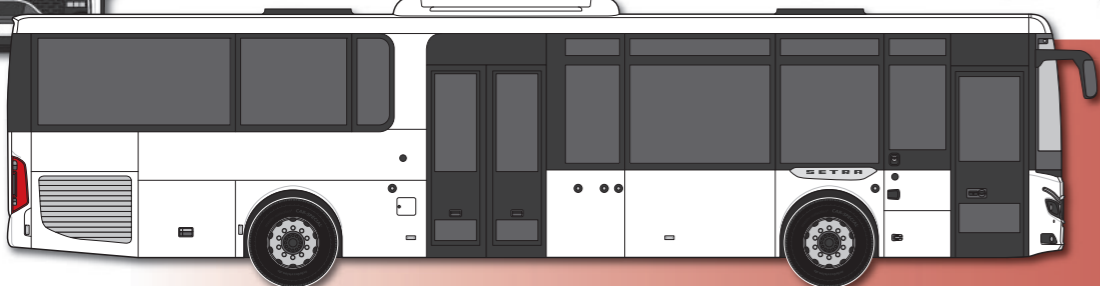

Place your design on the individual vehicle views. With one click you can select the painted surfaces of the car and colour them. You can hide or display entire views. Practical groupings make your work easier. This is how you work efficiently!

### Convincing presentation

Impress your customers with a quick and compelling presentation of your designs. Directly from your familiar graphics programme the scale usually allows printouts in A4 size. Or you can use the online tools CAR-SIGNER® or CAR-3D for your presentation.

### Clean production

With the use of professional vehicle outlines of creativ collection you quickly achieve results and have less film waste. This makes work more enjoyable and profitable. The true-to-scale data allows you to plan properly and print and plot efficiently.

Passenger vehicles

Delivery vans

Trucks / Lorries

Buses / Coaches

Trams

Containers

Aircrafts

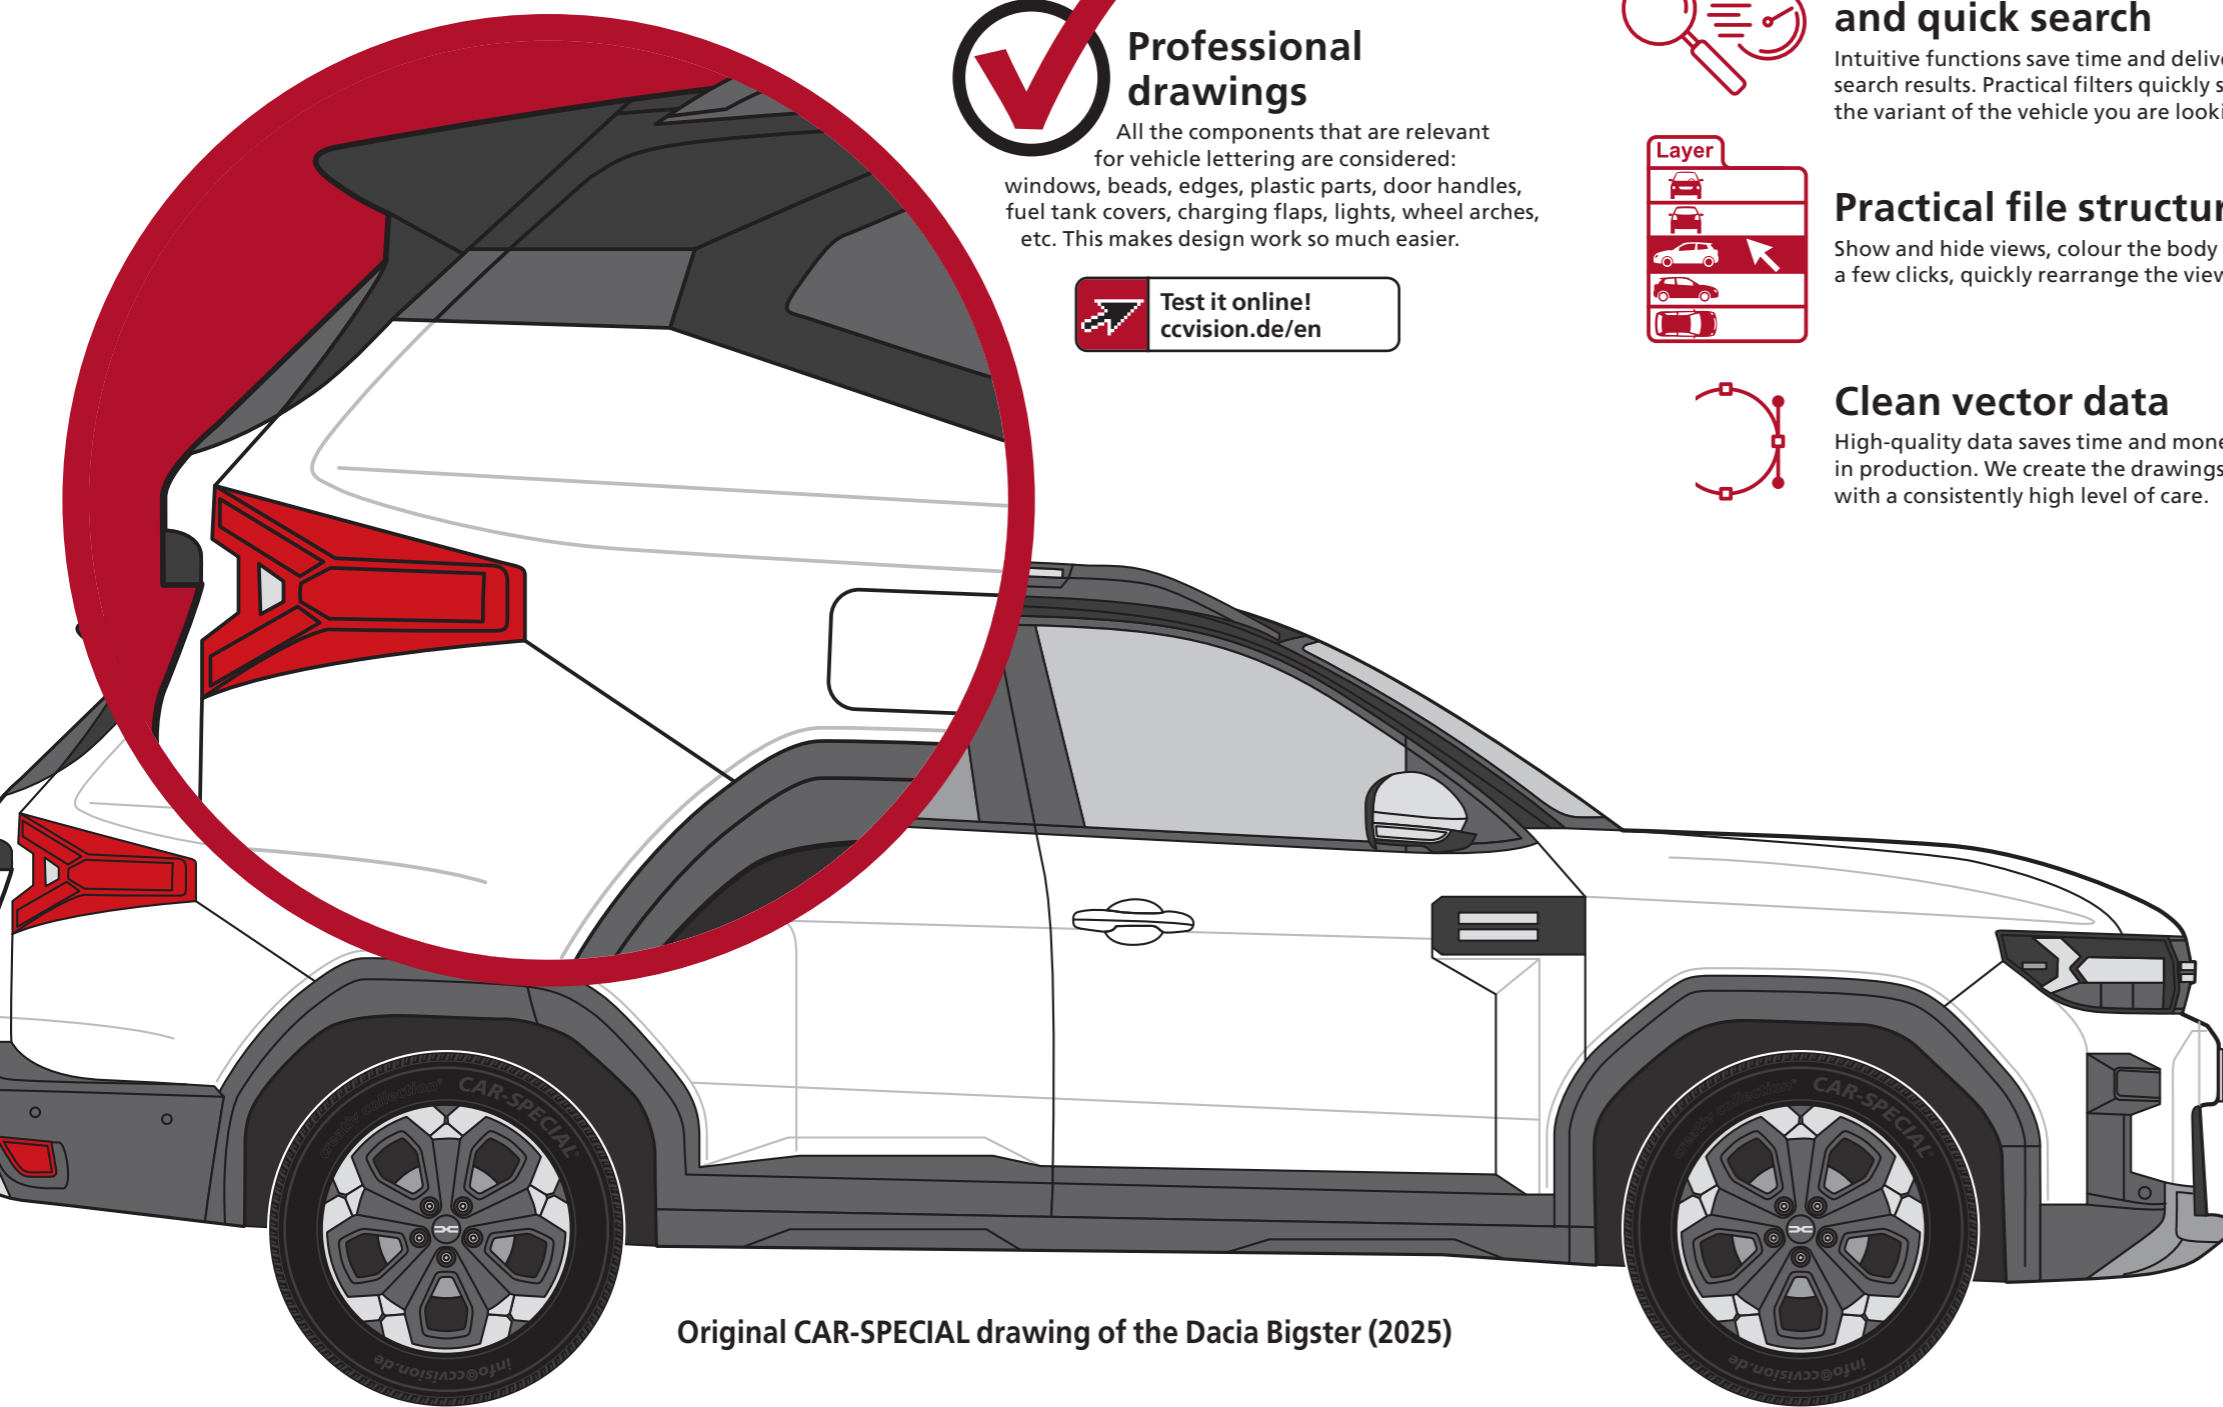

Motorcycles

Boats

CAR-SPECIAL vehicle outlines offer you lots of advantages. They make your daily work easier and save you time. From design to presentation through to production, you will benefit from our true-to-scale drawings.

Original CAR-SPECIAL drawing of the Dacia Bigster (2025)

### Professional drawings

All the components that are relevant for vehicle lettering are considered: windows, beads, edges, plastic parts, door handles, fuel tank covers, charging flaps, lights, wheel arches, etc. This makes design work so much easier.

### Very latest vehicles

With CAR-SPECIAL you are always right up-to-date because we constantly draw new vehicles and make them available for you to download.

### Convenient and quick search

Intuitive functions save time and deliver quick search results. Practical filters quickly show you the variant of the vehicle you are looking for.

### Practical file structure

Show and hide views, colour the body with just a few clicks, quickly rearrange the views ...

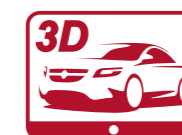

### Clean vector data

High-quality data saves time and money in production. We create the drawings with a consistently high level of care.

### Display-friendly scale

Cars and delivery vans in 1:30; trucks, buses and larger vehicles in 1:60. Aircraft in 1:300. This allows you to create your design in a "handy size".

### Attractive 3D presentation

Your customers will be impressed! In just a few minutes you can present your design in an ultra-modern way with our free 3D tool – and also stay on top of your workflow.

### Online design for quick layouts

With the CAR-SIGNER you – maybe with your customer – can quickly decide what the rough design should look like.

### Compatible formats

CAR-SPECIAL is suitable for any workflow and any standard program: AI, CDR, EPS, DXF (CDR also in 1:1 representation).

### Best possible basis for production

Using professional vehicle outlines means you get faster results and have less film waste.

### Free hotline

Personal, fast and competent, our staff will be happy to assist you: 0049 761 47924-0 • [info@ccvision.de](mailto:info@ccvision.de)

### All vehicle types are included

Cars, delivery vans, trucks, camper vans, buses and coaches, trams, trailers, containers, aircrafts, bikes, boats ... you will find them all.

# CAR-SPECIAL®

## The best vehicle search

With us you will not search for long and will quickly find what you want. With our practical features, filters, lots of information and comparison options, we ensure that you can get back to your real work as quickly as possible. With just a few clicks you can download the vehicle drawing you want and begin your design and start preparing your production straight away. Try it yourself for free and with no obligation: [ccvision.de/en/car-special](http://ccvision.de/en/car-special)

### The very latest models always in view

On the CAR-SPECIAL homepage you will find the very latest vehicle drawings. One click will show you all available versions of each model range. The search function and selection by manufacturer and model is also available instantly.

### Search function with direct suggestions

As soon as you type a few letters, you will be shown suggestions. Just one click takes you to the result. An example: If you type "spr", you will immediately be given the suggestions "Dacia Spring" and "Mercedes-Benz Sprinter".

### Search history "recently searched"

It is frequently the case that you require a model that you used recently. The "recently searched" function (for subscribers only) shows you your personal search history.

### Practical filters

To allow you to find the right model faster, particularly in the case of delivery vans and commercial vehicles, simply select features such as van/transporter, station wagon, platform, limousine, convertible..., length and height based on the model or entered in mm ..., number of doors at side and rear ..., windows at left, right, rear.

### Detailed vehicle description

By providing details of the model, facelift, doors, windows and useful tips, we show you all the information about the vehicle. This means you can be sure you are choosing the right vehicle. The length, width, height and wheelbase dimensions also help.

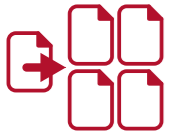

### Show differences

Have you already used the filters to reduce the number of variants of a vehicle from 110 to 5? You can now highlight the differences between the individual vehicles (for subscribers only), so you can see instantly which variant you require. Very practical!

### Compare with your own photos

Upload photos of the vehicle to be labelled and they will then be placed right next to the vehicle drawings. This is the best way to compare and be confident that you have found the customer's exact vehicle. The photo comparison is clearly structured with the front, rear, left, right and roof.

### Easy project organisation

Collect vehicle drawings in watchlists for each project or for each customer, for example. Simply drag & drop a vehicle drawing to the appropriate watchlist and that's it.

### Quickly estimate vinyl requirement

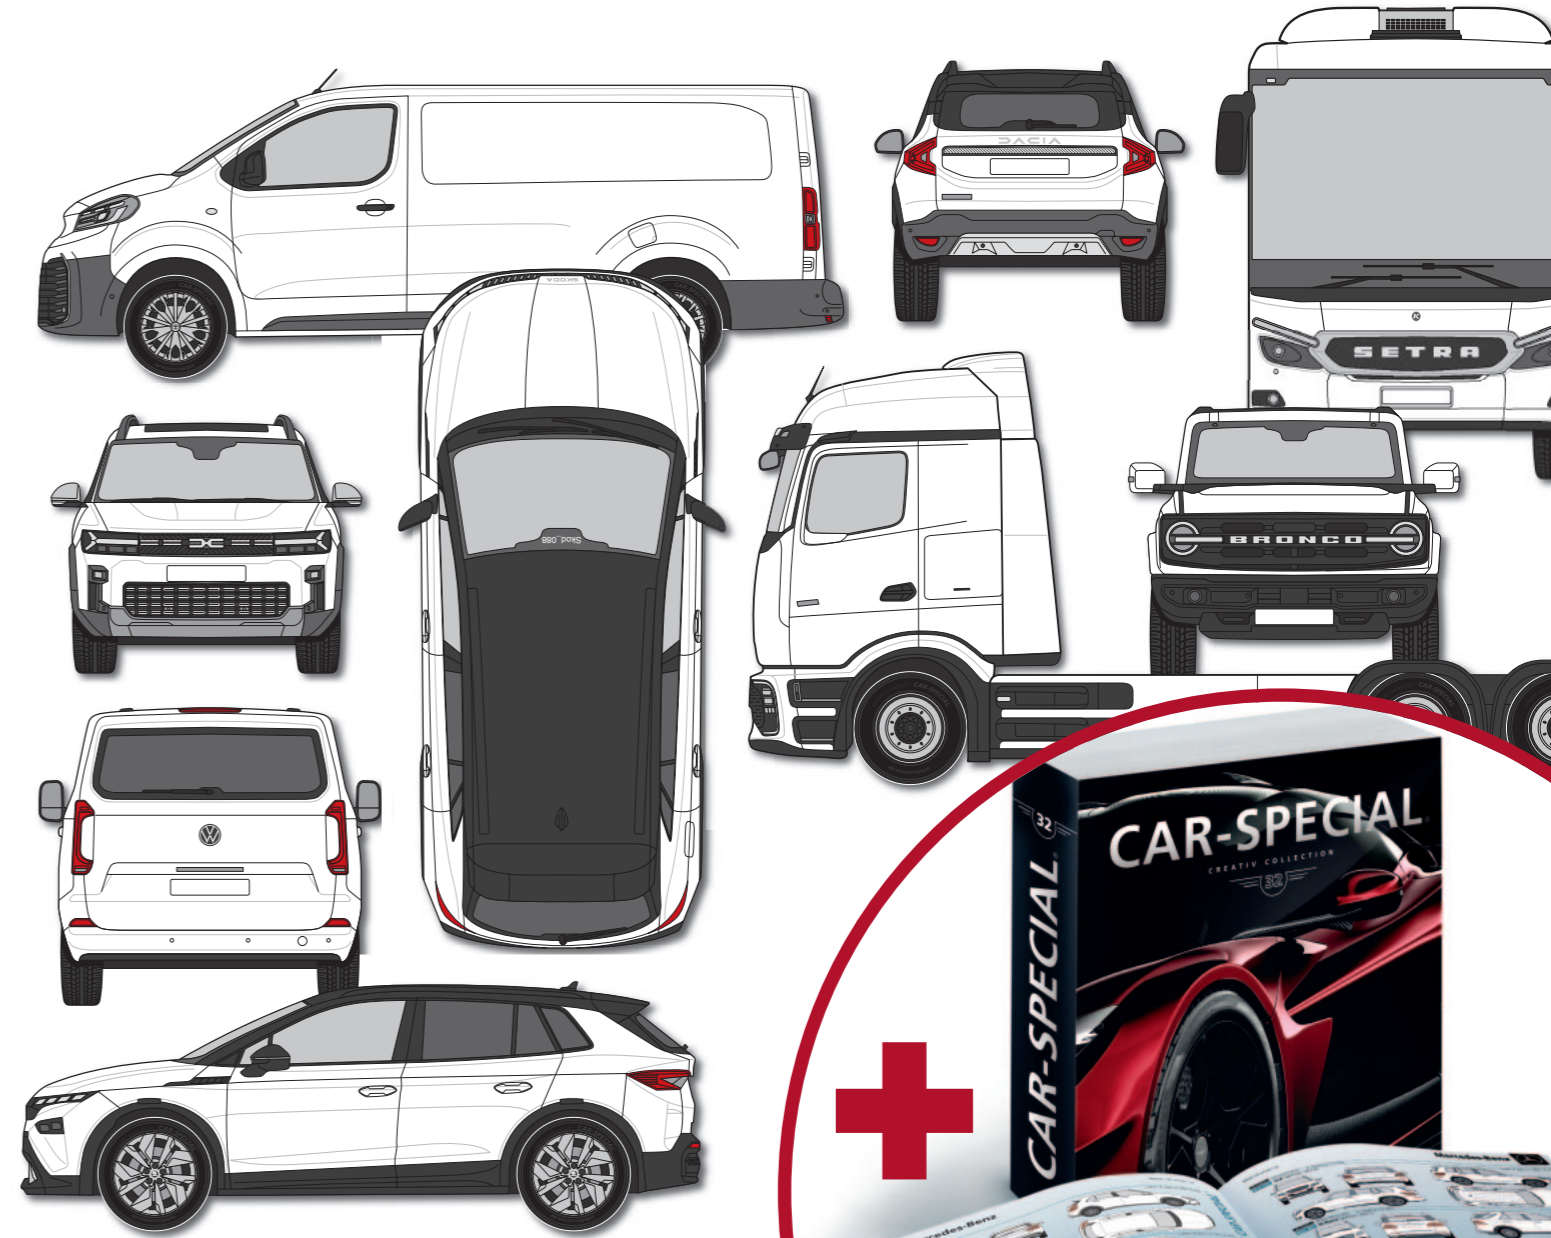

Each vehicle can be measured online (for subscribers only), so that you quickly know how much film is required and how the vinyl rolls need to be arranged. This information will allow you to make appropriate plans early on in any project.

# All current vehicles always at hand

The vehicle drawings of CAR-SPECIAL® are indispensable for professional lettering and wrapping

All vehicle types are included:
